### DETAILED ACTION

This is the third office action for U.S. Application 10/734,868 for Pedestals filed by Reed et al. on December 12, 2003. Claims 1-19 and 21-26 are pending. Claims 2-6 and 8-19 have been withdrawn.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 3,858,495 to Gotwalt. Gotwalt discloses a pedestal that has a pedestal base (10) with an upper surface that defines at least two pairs of open channels (34). Each pair of open channels is sized and spaced so that a straight support member (36) of constant cross section can be slidably fitted into the pair of channels with a midsection of the support member lying between the open channels and having an open space underneath it. The pairs of channels are placed on the upper surface so that when a straight support member is fitted into each pair of channels, the support members are parallel to each other. The pedestal base has two spaced-apart wall members (12 and 16) with each wall member having one of the open channels of each pair of channels. Gotwalt does not disclose the support members as having top surfaces that are in a single horizontal plane higher than the upper surface of the base,

or the specific height of the support members. However, those specific dimensions are a matter of design preference and it would have been obvious to one of ordinary skill in the art at the time of the present invention to have modified the size of the support members as a design preference depending on the desired rigidity or strength.

### ***Allowable Subject Matter***

Claims 7, 21-25 are allowed. The following is an examiner's statement of reasons for allowance: The prior art does not disclose a pedestal base with two pair of open channels that have at least two support members fitted into the channels in the upper surface of the base, the support members having a top surface that lies in a plane above the base, and the base comprising two-spaced apart wall members connected only by the support members.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
